

We understand our customer desires to offer the ingredients that satisfy their real needs.

Comprital has always invested heavily in research. The application of new stabilisers, the development of alternative products, like the additive free frozen yoghurt mix, are just some of the successes recorded. The company's research endeavours are driven by consumer feedback; through close contact with the consumer, we strive to understand how he works, so as to be able to interpret his desires and discover what it is he really wants. Our research team is available, every day, to offer technical assistance and support, to large and small concerns alike.
